

CommonTime: mSuite *For the Palm Pre*

Solutions for the Mobile Professional

mSuite for Palm Pre

mSuite for the Palm Pre provides users with the only enterprise solution that presents Domino information in an intuitive way that operates seamlessly and effortlessly. mSuite leverages the native PIM capabilities of the device for a complete integrated end-user experience.

Optimize the full capabilities of the Pre without utilizing extra device resources, such as battery life and memory to get the most out of your time as a mobile professional.

mSuite mobile framework

The addition of the Palm Pre on the mSuite Mobile Platform adds to CommonTime's device agnostic approach to mobile computing that already includes Windows Mobile, Symbian and iPhone. mSuite equips organizations with a complete mobile platform that features device management, LOB applications, remote device control, database connectors, PIM and email, mobile SDK's and enterprise grade security.

mSuite for Pre Benefits

- Increase end-user productivity with seamless access to corporate messaging and collaboration needs
- Reduce the amount of end-user and device resources by utilizing existing built-in protocols
- Provide a true push solution for PIM data that is stored locally on the device
- Promote consistent security requirements through remote wipe and password enforcement policies
- Establish consistent work practices, increasing the efficiency, effectiveness and productivity for the mobile workers

Enterprise Messaging

- Create, send, receive, delete, file, search and sort e-mail
- View, edit and send rich attachments
- Maximize battery life with scheduled sync options
- Synchronize e-mail sub-folders

Personal Collaboration

- Real-Time view of free/busy status of meeting attendees, rooms and resources available
- Schedule, receive and accept meetings in real-time
- Search, edit, add and delete contacts
- Utilize existing phone capabilities
- Manage public, shared and personal contacts
- Automatic phone caller ID integrated with contacts
